FULL-STACK DEVELOPER

I am a Full-Stack Web Developer with expertise in building scalable and high-performance web applications using technologies like React, Node.js, NestJS, PostgreSQL, and MongoDB. I am passionate about delivering clean, efficient code and creating user-friendly, robust digital solutions. I enjoy collaborating with cross-functional teams and continuously expanding my skills to stay aligned with evolving industry standards.

SKILLS

Node.js, Prisma ORM, TypeScript, NestJS, PostgreSQL, MongoDB, React, Socket.IO, GraphQL

PROFESSIONAL EXPERIENCE

SoftColon Technology Private Limited

Full - Stack Developer

Jun 2022 - Present

I am a dedicated and results-driven Full-Stack Web Developer with over 3 years of professional experience in building dynamic, scalable, and high-performance web applications. My expertise lies in Node.js, Prisma ORM, and TypeScript, with strong proficiency in backend development, database management, and modern JavaScript practices. Currently working at SoftColon Technology Pvt. Ltd., I have successfully contributed to a range of projects through my solid understanding of both front-end and back-end technologies. I am passionate about writing clean, maintainable code and building solutions that are reliable, efficient, and aligned with user needs. I thrive in collaborative environments, actively engaging with cross-functional teams to solve complex problems and deliver impactful products.

PROJECTS

Event Planner

Backend Developer

A platform for connecting companies, organizers, and skilled professionals in the event industry, covering areas like music, decoration, management, speakers, photographers, vendors, etc. It helps match users and organizations through profile-based recommendations and offers job opportunities for events and part-time work. Key features include project listings, bookmarking, achievement portfolios, and a role-based chat system to simplify communication between users, companies, and organizers.

The platform provides recommendations based on experience and achievements, helping companies and users find the right opportunities faster. It streamlines the entire workflow from connecting, communicating, hiring to completing projects.

Set-Center(Inventory & Order Management System)

Backend Developer

An inventory and order management platform for a food packaging company, replacing their offline system with an efficient online solution. The system streamlines order processing, inventory management, packaging workflows, and shipping operations across five key user roles:

- Headquarter Admin: Manages client orders.
- Printing Room: Generates packaging labeling
- Processing System: Manages packaging production lines through task-based workflows,
- Supplier: Handles raw material supply, inventory management, and direct shipping.
- Shipping: Manages logistics and delivery.

Improves operational efficiency, reduces manual work, and provides real-time data tracking for better decision-making.
